FULL STACK DEVELOPER

Experienced in applying my programming skills to solve complex challenges with a track record of improving software performance. Dedicated to software engineering with one and a half years of expertise, specializing in JavaScript/TypeScript, Java, SQL, and web development tools. In short, a millennial who loves living life every day and finds great joy in learning from everyone.

TECHNICAL SKILLS

Languages : JavaScript/TypeScript, Java, Kotlin, SQL, HTML, CSS, Sass

Frameworks : React, Angular, Node.js, ExpressJS, jQuery, Bootstrap, Tailwind, Redux, Vert.X, Material UI

Dev and API Tools : Visual Studio Code, Git, Gitlab, Postman

Databases : MongoDB, MySQL, PostgreSQL

Others : Agile (Scrum), Debugging, Root Cause Analysis

EXPERIENCE

Web Developer | *Bellevue Hotel and Spa*   *Sep 2022 – Dec 2023*
- Built and maintained hotel website for guests and online presence.
- Developed online booking system for efficiency and integrated website with social media for better reach.

Web Developer | *Inter Luxury Hotel*   *Nov 2023 – Feb 2024*

Full Stack Developer | *eTech S.C.*   *Mar 2024 -*
- Developing ERP Human Resource Management System for MeQrez Health Service S.C.

EDUCATION

Addis Ababa University	**Bachelor of Science in Information Technology** |	*Sep 2018 – Jun 2022*
Evangadi Networks	**Full Stack Web Development Bootcamp** |	*Jan 2023 – Oct 2023*

PROJECTS

ERP - HRMS | *Angular TypeScipt, Material UI, Java - Vert.X, PosgreSQL, Git, Scrum methodology*   *Mar 2024 -*
- Client: MeQrez Health Service S.C
- Creating User Interface Using Angular Js and HTML.
- Involved in the coding and Documentation of this project.
- Involved in Developing Angular HTML web pages and Anguar Material.
- Involved in Unit Test Cases.
- Fixing bugs/issues reported by the production team. Handling the team

Bank IT Support Management System | *React.js, Tailwind, Redux, Express.js, MongoDB, Git*   *Feb 2024*
- Developed a comprehensive IT support management system using React.js and Redux for frontend state management.
- Implemented backend functionality with Node.js and Express.js framework, ensuring efficient handling of server-side operations.
- Utilized MongoDB database for data storage and retrieval, facilitating seamless management of support requests and user information.
- Designed a user-friendly interface allowing bank branches to request support, track request status, and manage IT officers.

IT Officers Task Tracker | *React.js, Express.js, MySQL, Git* *Nov 2023*

- Developed a task management system using React.js for the frontend interface.
- Implemented backend functionalities with Node.js and Express.js framework to handle task management and user authentication.
- Utilized MySQL as the database to store task data, user information, and duty assignments securely.
- Designed an intuitive user interface for IT officers to add, edit, and delete tasks based on dates and assignees.
- Implemented real-time updates for task assignments and completion status using WebSocket technology.
